

Hello All!

Here is the rundown for the Week 25 Zoonotic Disease Report

- Statewide, 90 specimens have tested positive for rabies in 2019; four new positives were found in the last week.
- 2019 Colorado rabies positive specimens: Skunk(74) Bat(11) Raccoon(2) Fox(1) Bovine(1) Dog(1)
- Boulder County has had only two positive rabies specimens to date, both are bats.
- Two racoons and one bat tested negative for rabies this week.
- Mosquito traps jumped this week with nuisance species; of the 13,493 recorded mosquitoes, only 1.5% were *Culex*.
- Three mosquito pools were tested for WNV, all were negative.

You can find the full report attached. Let me know if you have any questions.
