

Zoonotic Disease Report July 18 – July 24, 2021 (Week 29)

Executive Summary

- Boulder County submitted 15 mosquito pools for West Nile virus testing. Three pools tested positive.
- WNV transmission risk is high and all residents are encouraged to take personal protective precautions.
- Mosquito abundance (all species) and Culex species (WNV vectors) are at historical highs for the week and expected to continue through the next several weeks.
- Statewide, 35 specimens have tested positive for rabies in 2021 including three domestic animals: Miniature Horse (Adams), Mule (Eagle), and Cat (Morgan).
- Three samples were submitted for rabies testing, three bats and one donkey. All specimens were negative.

Lab-confirmed, rabies positive animals by county, Colorado, Jan. 1 - July 10, 2021

County	Bat	Skunk	Other wildlife	Domestic	Total
Adams	1	2		1	4

Note: Table reflects only testing submitted by Boulder County Public Health. Additional testing may occur through other agencies.

Animal Disease Activity

Each week, Boulder County and municipal Animal Control Units responds to animal complaints throughout the county. When deemed necessary, these specimens are sent to state laboratories for zoonotic disease testing.

Caveats

- Data are provided from the Colorado Department of Public Health and Environment (CDPHE) Zoonotic database and may not include samples submitted for testing prior to publishing of this report.
- Data reflect all samples submitted by Boulder County Public Health by other agencies or private veterinary practices.
- 'Positive Vectors' include only samples that have tested positive. Some samples submitted may be deemed untestable.
- 'Submitted Vectors' denoted with (*) indicate that at least one sample was untestable. Untestable samples may be treated as positive for follow-up protocol.
- WNV pools only reflect samples submitted by Boulder County Public Health. Additional testing may occur through other agencies.
